WHO SHOULD ATTEND

This course is geared towards clinicians and practitioners.

Prerequisite course: McGill 1 is strongly recommended.

For those wanting to be considered for a “McGill provider” designation, please contact Professor McGill.

COURSE OBJECTIVES

To interview, observe, and probe and provoke pain to reach a precise diagnosis that will guide pain desensitization and build a foundation for pain-free activity. Technique development through patient/athlete case study workshops.

Delegates will take away:

Manual skills, clinical reasoning skills and patient tests both on and off the exam table.
