

McGill 2 Master level assessment course: Converging on a Precise Diagnosis

Taught by Professor Stuart McGill

This course is designed for all clinicians who have back pained clients. A few important points and take-away skills from this 2 day course:

- ✓ Novel assessments
 - ✓ Hands on skill development on and off patient tables
 - ✓ Diagnostic algorithms
 - ✓ Sort out mechanical, neurological, anatomical, psycho-social mechanisms of pain and disability
 - ✓ Converge on a precise diagnosis that will guide you to wind down the pain and build a foundation for pain free movement
 - ✓ Course finished with a live patient assessment
-
- ✓ Limited to 24 delegates for an intimate learning setting
 - ✓ Delegates receive certificate of completion from Backfitpro Inc.
 - ✓ Unique and robust social atmosphere
 - ✓ Located at the highly regarded Taboo Muskoka resort and golf club

What previous delegates say:

“The seminar itself should be a must for all of the professions. The assessment is concise, logical, and allows one to flow easily through the algorithms that one needs to go through in solving complex back problems.”

“I’ve been attending courses for over 20 years and this was the best overall experience with the content and the social program.”

“I found the lectures were packed with good information with many clinical pearls along the way. I truly thank Professor McGill for bringing his wisdom to the world and for putting on classes. I hope many more clinicians get to experience his teaching and many more patients will experience the restoration of their movement life.”

“This course has made me a better clinician. I cannot go back to the old way of practicing for the sake of patients and myself.”

“It’s amazing how I am able to fix so many more back pained patients.”
